Getting Started with 0nMCP

0nMCP is an AI orchestration engine with 870+ tools across 54 services. This starter pack gives you 10 pre-built workflows that automate common business operations.

Prerequisites

- > Node.js 18+ installed
- > 0nMCP installed (npm install -g 0nmcp)
- > At least one service connection configured

Setup Guide

1. Install 0nMCP: `npm install -g 0nmcp`
2. Initialize your workspace: `0nmcp init`
3. Import credentials: `0nmcp engine import`
4. Verify connections: `0nmcp engine verify`
5. Copy .0n files to `~/0n/workflows/`
6. Run any workflow: `0nmcp run <workflow-name>`

Workflow: Lead Capture Pipeline

File: lead-capture.0n

Receives webhook from form submission, creates CRM contact, adds to pipeline, sends welcome email, notifies via Slack.

Services Used

- > CRM
- > SendGrid
- > Slack

How to Run

Onmcp run lead-capture
